RFID SOFTWARE · UHF 865–868 MHZ · ASSET MANAGEMENT

RFID Asset Management

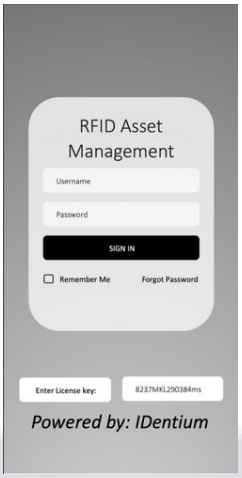
Register assets, audit by location on a handheld, export reports and trace missing items.

UHF RFID | Location-wise audits | Excel and PDF reports | Asset search | Handheld + fixed

Fixed-asset audits in a single sweep.

Identium RFID Asset Management software turns UHF tag reads into registration, audits, reports and search. Every asset carries a tag, and a handheld reader picks up the tags in a room in one sweep, instead of reading serial numbers off laptops, chairs and machines.

It suits manufacturing plants, logistics companies, IT departments, hospitals and offices. UHF tags read from a distance without line of sight, up to around 25 m with suitable tags and readers, and audit reports export to Excel or PDF or into your own software.



7	~25 m	2	3	865–868
Software modules	Suitable tags and readers	Report formats: Excel, PDF	Tag types by asset	India UHF band, MHz

WHAT IT DOES

Register, audit and report

REGISTER — Tag every asset

- RFID tag and barcode per asset
- Name, serial number, location
- Locations in the Location Master
- All Assets list with status

AUDIT — Location-wise audits

- Pick a location, press trigger
- Scanned and not-scanned lists
- Audits saved to local database
- Raw Inventory with timestamps

REPORT — Reports and search

- Dated audit reports
- Export to Excel and PDF
- Import into your software
- Search homes in on a tag

WHERE IT WORKS

Where it is used

Fixed assets	IT equipment	Offices	Hospitals	Factories	Outdoor plant
Annual audits	Laptops, servers	Furniture, fixtures	Medical equipment	Machinery	Generators

HOW IT WORKS

From tagged assets to a dated audit report

Assets
Each carries a UHF tag chosen for its surface

CX1500N
UHF handheld for registration, audits and search

Asset Management
IDENTIUM RFID ASSET SOFTWARE

- Map tag and barcode to each asset
- Audit a location from the dropdown
- Save audits to the local database
- Generate dated audit reports
- Guide you to a missing asset

Reports
Excel and PDF, or imported into your own software

Doorways and printing
An IF9A at a doorway records assets moving in and out; the IT4RL printer prints and encodes your asset tags.

WHY IDENTIUM ASSET MANAGEMENT

Built around a real audit cycle

Asset registration
Map each RFID tag and barcode to the asset's name, serial number and location.

Location Master
Set up your locations once in the Location Master, then audit and report location by location.

Location-wise audit
Choose a location and press the trigger: the screen shows assets scanned and not scanned.

Dated audit reports
Export to Excel or PDF, or import the audit report into your own software.

Asset Search
Check the last audit for a missing asset, enter its RFID number and use the trigger to home in on the tag.

Raw Inventory
Scan tag numbers with a timestamp for quick counts.

All Assets view
Every registered asset with its status, exportable to Excel and PDF.

A matched hardware set
CX1500N handheld, IF9A fixed reader and IT4RL printer, with tags chosen per asset type.

CHOOSING TAGS

Tags for your assets

ASSET TYPE	TAG TYPE	TYPICAL SIZES
Furniture, fixtures, cables and other non-metal items	Soft UHF labels	33 × 13, 45 × 18, 73 × 20, 68 × 26, 98 × 27 mm
Laptops, monitors, TVs, ACs, servers, water purifiers	Flexible on-metal labels	60 × 25, 70 × 30 mm
Generators, water coolers, outdoor machinery	Rugged RFID tags	60 × 20, 177 × 25 mm

Share your asset count and asset types and we quote the tags, readers and software scope you need.

AT A GLANCE

- Registration, location-wise audits, reports and search
- Reports export to Excel and PDF or into your software
- Used with the CX1500N, IF9A and IT4RL

YOUR ORDER

- RFID asset management software
- UHF tags per asset type: soft, on-metal or rugged
- CX1500N handheld; IF9A fixed reader and IT4RL printer as needed

ORDERING

Software — RFID asset management software, quoted with your asset count and scope.

Hardware — Tags, CX1500N handheld, IF9A fixed reader and IT4RL printer, quoted to your site.

SPECIFICATIONS

Technical data

SOFTWARE	
Technology	UHF RFID
Modules	Asset Registration, All Assets, Location Master, Asset Audit, Audit Report, Asset Search, Raw Inventory
Identifiers	RFID tag and barcode mapped to each asset
Asset fields	Asset name, serial number, location

DATA AND REPORTS	
Audit storage	Completed audits saved to the local database
Report formats	Excel, PDF (dated)
Integration	Audit report imports into your own software

HARDWARE	
Compatible with	CX1500N UHF handheld reader, IF9A fixed reader, IT4RL RFID printer
Tag options	Soft UHF labels, flexible on-metal labels, rugged tags
India band	865–868 MHz
