

2.4 GHz Indoor Active RFID Reader F530

Model F530 · Brand: Identium

A short-range active RFID reader for doorways, building entrances and school buses. It logs active tags within 5 m at factory default and sends data over GPRS, so no data cabling is needed.

KEY FEATURES

- **Short read zone: 5 m maximum at factory default**
- **GPRS base station with a wireless design, no data cabling**
- Bluetooth link to a mobile app for configuration and testing
- Real-time tag reads tied to the reader's own location
- Widely used on school buses and at building entrances

APPLICATIONS

School bus attendance

Building entrance monitoring

Staff presence logging

Visitor entry tracking

Indoor asset presence
