

RFID Cylinder Tags

Model CY3 · Brand: Identium

A UHF RFID tag in an ABS body for commercial and industrial gas cylinders and other metal equipment. It works at 865–868 MHz, so cylinders can be identified, counted and their records updated without contact.

KEY FEATURES

- **Made for gas cylinders and other metal equipment**
- **Designed to stay readable under high temperature and pressure**
- 865–868 MHz UHF, India's licence-free RFID band
- Rewritable: update ID, ownership and history without contact
- Multi-read: identify a group of cylinders in one scan
- ABS housing, supplied boxed

APPLICATIONS

Gas cylinder tracking

Filling plant checks

Delivery vehicle loading

Pressure vessel records

Boiler and pipe inspection

Lift maintenance records

Lifting equipment audits
