RFID File Tracking System for Offices & Record Rooms

Model RFID File tracking Solution · Brand: Identium

A complete RFID system for tracking physical files and documents. Tagged files are logged automatically as they leave or enter a room, a handheld reader finds a specific file on the shelf, and cloud software keeps every movement on record.

KEY FEATURES

- **UHF RFID tag on each file or folder**
- **Fixed readers at capture points log every file out and in**
- Handheld reader pinpoints a specific file inside the room
- Cloud-based software shows where each file was last recorded
- All movement records stored digitally, replacing the paper register
- Sized to your number of files, capture points and handhelds

APPLICATIONS

Government record rooms · Courts & registry offices · Bank loan file custody · Hospital medical records · Legal & HR archives · Corporate document stores
