RFID Infant Monitoring Systems

Model RFID Infant Monitoring Systems · Brand: Identium

A ready-made RFID security system for maternity and newborn wards. Each baby carries an RFID tag, readers in the hospital track it, and staff get real-time alerts on a mother–baby mismatch or an attempt to take a baby away.

KEY FEATURES

- **Complete newborn security system designed in-house by Identium**
- **RFID tag on each newborn, tracked by readers in the hospital**
- Real-time alerts on mother–baby mismatch and abduction attempts
- Adds active alerting to CCTV, which only records incidents
- Suited to large hospitals with heavy daily footfall

APPLICATIONS

Maternity wards · Post-natal wards · Newborn care units · Government hospitals · Private nursing homes · Multi-block hospital campuses
