

RFID Smart Tray

Model RFID Smart tray for jewellery · Brand: Identium

A cable-free RFID tray for jewellery counters: lay tagged pieces on its velvet surface and the tray reads them and sends the list over Bluetooth to a phone or tablet, running up to 6 hours on its built-in battery.

KEY FEATURES

- **Bluetooth link to Android and iOS phones and tablets**
- **Built-in rechargeable battery, up to 6 hours working time; Type-C charging**
- Reads only tags placed on the tray; stray tags nearby are not read
- Soft velvet surface protects rings, chains and other pieces from scratches
- Adjustable RF output power
- Aluminium-finish body with waterproof LED and power buttons

APPLICATIONS

Jewellery showroom counters

Tray-wise stock counts

Opening and closing counts

Mobile stock audits
