

RFID UHF Gate Reader

Model HLR200 · Brand: Identium

A UHF RFID gate that reads tagged items, people or vehicles as they pass through, with sensors that tell entry from exit. Its built-in LED, buzzer and industrial alarm flag unauthorised movement at warehouses, libraries, stores and offices.

KEY FEATURES

- **Read range up to 4 m**
- **Reads multiple tags at once as they pass through**
- Two-way direction sensors detect in and out movement
- Built-in LED, buzzer and industrial alarm
- Contactless detection with no manual scanning
- Built for industrial environments

APPLICATIONS

Warehouse exits

Logistics movement tracking

Asset exit control

Library security gates

Retail store exits

Access control

SPECIFICATIONS

Model	HLR200
Type	UHF RFID gate reader
Frequency	UHF, 865–868 MHz (India)
Read range	Up to 4 m
Multi-tag reading	Multiple tags at once
Direction detection	Built-in two-way sensors (in/out)
Alerts	Built-in LED, buzzer and industrial alarm
Environment	Industrial use
