

HF Library Security Gate, ISO 15693, Single Aisle (EAS Alarm)

Model — · Brand: Identium

A pair of pedestals at the library exit that sound an alarm when a book carrying an ISO 15693 label whose EAS bit is still set passes between them, so an un-issued book cannot leave. Works with the ICODE SLIX-type labels sold here and the staff pad that clears the bit at issue.

KEY FEATURES

- **Single aisle: two pedestals, one walkway between them**
- **13.56 MHz, ISO 15693; alarms on labels with the EAS bit set**
- Audible and visual alarm; people counter as sourced
- Pairs with the HF staff pad and our ISO 15693 library labels
- Aisle width and detection window confirmed in the quotation

APPLICATIONS

Public and academic libraries

School libraries

Corporate knowledge centres

Archives and reading rooms
