

J41 UHF Micro tag

Model J41 · Brand: Identium

A very small UHF RFID inlay for items with no room for a standard label, such as PCBs, specimen containers and jewellery tickets. EPC Class 1 Gen 2, 860–960 MHz, up to 5 m read range in open air.

KEY FEATURES

- **Micro-size UHF inlay for items where a standard label will not fit**
- **EPC Class 1 Gen 2, responds across 860–960 MHz**
- Read range up to 5 m in open air, depending on the reader
- Rated for 100,000 write cycles and 10-year data retention
- Pre-encoded EPC data available on bulk orders

APPLICATIONS

PCBs and electronics

Specimen containers

Jewellery tickets

Embedded product tracking

Dense small-item tagging
