

RFID AI Inventory Box AI-INV-BOX-01 with QR Scanner & Printer

Model AI-INV-BOX-01 · Brand: Identium

A desktop RFID counting station: place tagged items inside and every tag is read automatically. A narrow-beam UHF antenna reads only what is in the box, and a QR scanner and receipt printer are built in for receiving, dispatch and audits.

KEY FEATURES

- **Automatic scanning:** items are read the moment they go into the box
- **Narrow-beam UHF antenna reads only tags inside the enclosure**
- AI middleware removes duplicate reads and validates SKUs
- Built-in QR code scanner for barcode-labelled stock
- Integrated thermal receipt printer for slips and audit records
- REST APIs push reads to SAP, Oracle, Tally, Zoho or a custom ERP; SDK supplied

APPLICATIONS

Retail stockroom audits

Warehouse receiving checks

Dispatch verification

Jewellery stock counts

Tool-crib check-in/out

Pharma and FMCG inventory

Garment inventory

Library and documents

SPECIFICATIONS

Technology	UHF RFID
Antenna	Narrow-beam UHF antenna, reads inside the enclosure only
Scanning	Automatic on placement, no trigger
Barcode	Built-in QR code scanner
Printer	Integrated thermal receipt printer
Software	On-board AI middleware: duplicate removal, SKU validation
Integration	Documented REST APIs; SDK for custom applications
Form factor	Compact desktop unit
