

RFID-Blocking Card for Wallets (13.56 MHz NFC Shield, CR80)

Model — · Brand: Identium

A CR80 card that sits in a wallet with contactless bank, metro and access cards and shields them from 13.56 MHz readers while it is there. No battery, nothing to switch on; printable both sides, so it doubles as a branded gift or part of a bank's card-onboarding kit. It does not shield 125 kHz or UHF tags.

KEY FEATURES

- Shields 13.56 MHz (ISO 14443) contactless cards in the same wallet
- Does not shield 125 kHz access cards or UHF tags such as FASTag
- No battery; nothing to charge or switch on
- CR80 85.6 × 54 mm, about 0.8 mm; fits any card slot
- Full-colour printing both sides for corporate gifting and bank kits

APPLICATIONS

Corporate gifting

Bank card-onboarding kits

Promotional giveaways

Personal wallets
