

RFID Card & Password Keypad Cabinet Lock IDTS-KPL7

Model IDTS-KPL7 · Brand: Identium

A keyless lock for wooden cabinets, wardrobes, drawers and lockers that opens with a password on its touch keypad or with an RFID card. The keypad mounts outside the door and the battery-powered lock body inside, so no mains power or cable run is needed.

KEY FEATURES

- **Opens with a password on the touch keypad or an RFID card at the CARD area**
- **Decoy digits: type extra numbers before and after the real code to stop onlookers**
- Keypad outside, lock body inside, joined through $\Phi 8$ mm and $\Phi 15$ mm holes in the door
- Runs on 4 × AA batteries (6 V); no mains power or cable run to the cabinet
- Low-voltage beep below 4.5 V; will not lock below 4 V
- Card compatibility checked against your card type or a sample before you order

APPLICATIONS

Wooden office cabinets

Wooden wardrobes

Wooden staff lockers

Desk drawers

Phone charging cabinets

Shoe cabinets

Wooden deposit lockers
