

RFID Handheld Scanner Evaluation Kit – UBR90H UHF Keyboard Scanner + Sample Tags

Model UBR90H-EVK · Brand: Identium

Try UHF RFID in software you already use: the UBR90H handheld scanner reads one tag at up to 35 cm and types its number into Excel, your ERP or a web form. The kit adds a 2.4G USB dongle and UHF sample tags.

KEY FEATURES

- **No software needed: the UBR90H types each tag number into Excel, an ERP screen or any app as a keyboard (plug and play)**
- **Plug and play: types each tag number as a keyboard (HID), with no driver to install**
- **Connects over Bluetooth LE, 2.4 GHz wireless with the supplied USB dongle, or USB**
- Reads EPC Gen2 (ISO 18000-6C) UHF tags one at a time at up to 35 cm
- 0.9-inch OLED shows tag type, tag ID and battery status; readable in strong light
- Offline mode stores up to 128 tag records to upload over USB later
- Sample kit: UHF tags and labels for your items; sample mix confirmed with your order

APPLICATIONS

Billing counter scans

Stock counter checks

Asset check-in desks

Library issue desks

Records room desks

Goods-in checks

Walk-around spot checks
